Description of Problem

Please include a detailed description of the issues, as well as a description of and a copy of any professional studies, citations or reports from government entities, recommended solutions, and any cost information or estimates. If additional space is needed, please attach.

The existing direct digital control system needs to be upgraded. The existing system has a few areas that are on the Delta Controls (Boilers and Pumps), but everything else is on a different insufficient system. The unit ventilators located in the classrooms are not functioning properly. The need to be removed and replaced with new unit ventilators with actuators, dampers, and controls. The new unit ventilators would then be controlled with the new Delta control system. There are two air handler units that also need to be replaced.

Project Category: HVAC

Are any of the above-described issues in buildings or part of buildings that are leased to another entity, including a district sponsored charter school? N
